Knowledge Transfer—What you will learn

- Understand the leadership commitment required for a successful transformation
- Learn the basic and advanced tools and techniques
- Learn how to link your strategic planning process to tactical improvement activity
- Learn how to track event charter, preparation, execution and sustainment using the A3 process
- Learn how a robust improvement process is developed and sustained
- Understand how to use transparency to measure local and global success
- Learn how rapid improvement events are the vehicle for cultural transformation and breakthrough results
- Learn how to create horizontal and vertical alignment through your organization

Why Simpler Certification?

This curriculum is focused on either starting or accelerating your transformation. Most certification ends with a certificate, but no quantifiable and sustainable improvement can be seen. This certification is unique in that it will not only improve the capabilities of your people, but it will also generate results throughout your organization. The net benefit is improved skills for targeted people with a direct return on the company's investment.

- Training conducted by experienced Sensei
- Improvement targeted in key value streams
- Learning from lecture, scenerio based, simulations, breakouts and application
- A3 thinking applied at three levels of the organization
- Focused on a business system philosophy vs. just tools and techniques
